

TABLE OF CONTENTS

A. PFC Emissions Reduction

Analysis of IPCC PFC Emissions Estimating Methodology L. Beu, J. Peterson, and P.T. Brown, (Motorola)	1
Comparison of PECVD Chamber Cleaning Processes (Environmental, Productivity, and Economic Considerations) C. Allgood, S. Hsu, and M. Mocella (Dupont Electronic Gases)	9
Reduced Clean Time and PFC Emissions Reduction Through Remote Plasma Clean For Lamp Heated CVD Chambers L. Mendicino, C. Nauert, P.T. Brown, S. Golovato, B. Day (Motorola), A. Atherton, T. Nowak, D. Silveti (Applied Materials), C. Hartz, A. Johnson and P. Maroulis (Air Products and Chemicals)	15
The Evaluation of Hexafluorobenzene as an Environmentally Benign Dielectric Etch Chemistry R. Chatterjee, S. Karecki, R. Reif (MIT Microsystems Technology Laboratories), T. Sparks, V. Vartanian, and B. Goolsby (Motorola)	28
Reactor Dependence of NF_3 /Hydrocarbon Chemistry for Global Warming Emissions Reduction in Dielectric Etching L. Pruette, S. Karecki, R. Chatterjee, R. Reif (MIT Microsystems Technology Laboratories), D. Cowles (Air Liquide), and K. Kirmse (Texas Instruments)	38
Safe Fluorine Gas Source for Semiconductor Materials Processing J. Arno and E. Sturm (ATMI, Inc.)	48

B. Process Emissions Characterization

Analysis of Implanter Source-Region Exhaust by FTIR B. Goolsby, V. Vartanian, M. Rendon, M. Wagner and L. Mendicino (Motorola)	59
Characterization and Abatement of Emissions from Advanced CVD Processes L. Mendicino, V. Vartanian, B. Goolsby, P.T. Brown, K. Reid (Motorola) and J. Van Gompel (BOC Edwards)	68
Fate of Fluorine Emissions from NF_3 -Based CVD Chamber Cleaning Process V. Vartanian, B. Goolsby, L. Mendicino, P.T. Brown, J. Vires, D. Babbitt, and B. Raley (Motorola)	78

C. Alternative Cleaning Technologies

White Paper on Novel Wafer Cleaning Technologies S. Pawsat (Motorola Assignee to International SEMATECH)	94
Environmental, Safety, and Health Benefits and Issues Associated with DI/Ozone Resist Strip Process S. Burnett and W. Worth (International SEMATECH)	114
Reducing Environmental Impact with Ozone Based Processes S. Nelson (FSI International, Inc.)	126
RCA Clean Optimization B. Raley, J. Molloy, and B. Taylor-Burton (Motorola)	134
Cryogenic CO ₂ Cleaning Process Analysis in the Semiconductor Industry W.K. Barbee, and J.J. Lee (Motorola)	144

D. Material Management and Waste Treatment

Creating Win-Win: Leveraging Insight into Industrial Environmental Decision Making D. Bauer (USEPA), N. Krishnan (UC Berkeley) and T. Francis (Applied Materials)	152
Reduction of Waste Generation and Extension of Bath Life in Copper Electroplating Systems J. Clark, O. Blachier, and J. Dickinson (BOC Edwards)	160
Recycling of Solvents from Used Photoresist Strippers D. Follweiler (Ashland ACT)	167
Slurry Management Systems: Environment, Safety and Health Considerations J. Bare (BOC Edwards)	172
Management of Tungsten CVD Effluents Y. Gu, K. Grout (MKS Instruments), and S. Haupt (IBM)	177
EHS Infrastructure Issues in Modern Wafer Fabs P.T. Brown, R. Reblin, J. Heironimus, C. Nauert, and L. Mendicino (Motorola)	183
Current Issues with Monitoring Arsine in the Semiconductor Industry W.K. Barbee (Motorola)	199
