Vol. 17, No. 1

## 34 New Materials and New Configurations for Advanced Electrochemical Capacitors

*by K. Naoi and P. Simon*

## 38 Nanostructured Carbons: Double-Layer Capacitance and More

*by P. Simon and A. F. Burke*

## 44 Advanced Polymers as Active Materials and Electrolytes for ECs and Hybrid Capacitor Systems

*by K. Naoi and M. Morita*

## 49 Manganese Oxides: Battery Materials Make the Leap to Electrochemical Capacitors

*by D. Bélanger, T. Brousse, and J. W. Long*

## 53 Electrochemical Capacitors: Challenges and Opportunities for Real-World Applications

*by J. R. Miller and A. F. Burke*

### On the cover...

Cover design by Dinia Agrawala. Artist's conception of a multifunctional electrode architecture for electrochemical capacitors in which nanoscopic manganese oxide deposits (green spheres) are distributed on a 3-dimensional, ultraporous, conductive carbon substrate (purple framework). Image generated by Michael S. Doescher (Naval Research Laboratory, 2004) using POV-RAY software, in support of the research programs of Jeffrey W. Long and Debra R. Rolison (Naval Research Laboratory).
