

TABLE OF CONTENTS

PREFACE	iii
---------------	-----

Field Emitter Arrays

Tip Self-Heating to Enhance Microfabricated Cold Cathode Operation Lifetime	3
<i>P.R. Schwoebel, C.A. Spindt, C.E. Holland, and J.A. Panitz</i>	
Laser Assisted Fabrication of Single Crystalline Tungsten Rods for use as Field Emitting Cathodes	5
<i>K. Larsson Björklund, C. Ribbing, H. Norde, and M. Boman</i>	
Theory of H Induced Enhancement of Field Emission from an O Covered Mo(110) Surface	16
<i>P. von Allmen, R. Ramprasad, L.R.C. Fonseca, and P. Ordejon</i>	
Process Simulation of a Silicon Field Electron Emitter with Integrated Double-gated Beam Focusing Lens	22
<i>G. Oleszek and M. Rodriguez</i>	

Carbon Nanotubes

Carbon Nanotube Cold Cathodes Fabrication and Properties	31
<i>C. Bower and W. Zhu*</i>	
Calculating the Field Emission Current from a Carbon Nanotube	43
<i>P. von Allmen, L.R.C. Fonseca, and R. Ramprasad</i>	
Scanning Anode Field Emission Microscopy on Carbon Nanotube Thin Film Emitters	52
<i>L.O. Nilsson, O. Groenig, P. Groenig, and L. Schlapbach</i>	
Template Based Carbon Nanotubes as A Field Emitter	65
<i>S.-H. Jeong, H.-Y. Hwang, K.-H. Lee, W.-K. Cho, K.-Y. Kim, and H.-S. Jeong</i>	
Field Emission Cathode from Aligned Arrays of Carbon Nanotubes	74
<i>A. Govyadinov, P. Mardilovich, and D. Routkevich</i>	

Electron Emission Cooling

Cooling by Field Emission into the Vacuum with Resonant Tunneling: Design Parameters	91
<i>R. Tsu*</i>	
New Results on Microelectronic Cooling Using the Inverse Nottingham Effect: Low Temperature Operation and Efficiency	99
<i>P.H. Cutler, N.M. Miskovsky, N. Kumar, and M.S. Chung</i>	

Theory and Simulation

The Semiconductor Statistical Hyperbolic-Ellipsoidal Model For Evaluation of Current From Microstructures	115
<i>K.L. Jensen</i>	
Non Equilibrium Field Emission from Wide Bandgap Semiconductors ...	131
<i>G.L. Bilbro</i>	
Onset of Current Self-Quenching in an InP/CdS/LaS Cold Cathode	141
<i>Y. Modukuru, M. Cahay, and P.D. Murnford</i>	

Negative Electron Affinity/ Low Electron Affinity

Novel Electron Sources	157
<i>V.T. Binh*, V. Semet, and J.P. Dupin</i>	
Effect of Surface Properties on Electron Energy Distribution from C(111) and C(100) Surfaces	167
<i>J. Yater and A. Shih</i>	
Synthesis and Work Function Measurement of LaS and NdS Bulk Samples	179
<i>Y. Modukuru, J. Thachery, H. Tang, M. Cahay, and P. Boolchand</i>	

Carbons, Diamond, and a-Silicon

Electron Emission from Carbon Films	193
<i>R.J. Nemanich*, F.A.M. Köck, and J.M. Garguilo</i>	
Fabrication and Characterization of Cathodoluminescent Devices made Using Porous Silicon as a Cold-Cathode Field Emitter	201
<i>D. Heyde Elqaq and M.-A. Hasan</i>	
Monolithic Thin Film Edge Emission Diodes	209
<i>H.R. Kim, L. Karpov, V. Bhatia, and M. Weichold</i>	
Electron Emission Characteristics of Diamond	215
<i>B. Pate*</i>	
Conditioning of Amorphous Cathodes via Current Stressing	226
<i>S.R.P. Silva*, J.D. Carey, C.H. Poa, and J.M. Shannon</i>	
Field Emission Display Development at Motorola	247
<i>A.A. Talin, B.F. Coll. Yi Wei, K.A. Dean, and J.E. Jaskie</i>	
Rehybridization of Atomic Orbitals and Field Emission Properties of Nanostructured Graphite-like Materials	263
<i>A.N. Obraztsov, A.P. Volkov, A.I. Boronin, and S.V. Kosheev</i>	

* Invited Speaker
