CONTENTS

Non-steady-state Kinetics of the Reactions of Electrode Generated Intermediates. Resolution of the Kinetics of Proton Transfer Reactions of Methylarene Radical Cations
V. D. Parker, Y. Zhao, and Y. Lu .................................................. 1

A Catalytic Redox Chain Initiated by the Cation Radical of 1,4-Dimethoxy-2,5-di-tert-butylbenzene
L. Appelbaum, M. Oron, and M. Michman .................................. 5

Electrochemical Generation of Aryl Radicals Using an Arene Mediator and Their Cyclization Reactions
M. Tokuda, N. Kurono, and E. Honda ........................................... 9

Selective Synthesis of α-Chloroepoxides by Electroreductive Cross-Coupling of Methyl Trichloroacetate with Aliphatic Aldehydes Using Reactive Metal Anode
I. Nishiguchi, S. Goda, T. Kikkawa, Y. Ishino, and H. Maekawa ........... 13

Polymer Supported N-Oxyl Mediated Electrooxidation of Alcohols in Aqueous NaBr/NaHCO₃

“Cation Pool” Method. Generation and Accumulation of Carbocations by Low Temperature Electrolysis

Preparation of Organofluorine Compounds by the Anodic Oxidative Fluorination of Iodine Compounds
M. Sawaguchi, T. Fukuhara, S. Harada, and N. Yoneda ..................... 25

Electrochemical Bromohydroxidation of Indene for Manufacturing of Indene Derivatives
S. Torii, Y. Kubo, Y. Miyawaki, and H. Tanaka .............................. 29

Highly Diastereoselective Electrolytic Fluorination Using Amino Acid and Camphor as Chiral Sources
T. Fuchigami, D. Baba, and H. Ishii .............................................. 33

Effect of Chemical Modification on Electrochemical Li Insertion in Highly Ordered Multi-Wall Carbon Nanotubes
I. Mukhopadhyay, Y. Yokoyama, F. Okino, S. Kawasaki, H. Touhara, and W. K. Hsu ............................................................... 37
Pyrolysis/GC/MS Analysis of the Surface Film Formed on Graphite Negative Electrode
Z. Ogumi, A. Sano, M. Inaba, and T. Abe........................................41

Application to Lithium Battery Electrolyte of Lithium Organoborate with Salicylic Ligand
Y. Sasaki, N. Nanbu, K. Kurashima, T. Tonuma, and K. Usami.............45

Direct and Indirect Electrochemical Reduction of Glycosyl Halides in THF
R. D. Little and J. D. Parrish....................................................49

Cathodic Reactions of (Bromoalkyl)benzoates and bis-(Bromoalkyl)-terephthalates: Alkyl-oxygen Fission
J. H. P. Utley, C. Scholten, E. Kuljanac, Y. Gao, and J. Zhao..............53

Indirect Electrochemical Activation of gem-Dihalocompounds — Synthetic Applications

Radical-Ion Hydridimerization and Dehydridimerization Reactions — Rationalization of Mechanisms
J. Grimshaw.................................................................61

Anodic Electrochemistry: Studies Toward the Effective Use of Radical Cations in Synthesis
K. D. Moeller, B. Liu, H. K. Reddy, H. Sun, Y. Sun, A. Sutterer, and K. Chiba.................................................................65

Two-electron-transfer Redox Systems. Part 4. Electrochemical Oxidation of Hexakis(benzylthio)benzene — Formation and Reaction of a Radical Cation
B. Speiser, K. Ludwig, A. Stauß, and M. G. Quintanilla........................69

Approaches to the Anodic Generation of Quinodimethanes
C. Scholten, E. Kuljanac, E. Steckhan, and J. H. P. Utley..................73

Electrochemical Oxidation of Siloles: 2,3,4,5-Tetraphenyl-1-silacyclopentadiene Derivatives
J. Y. Becker, Z.-R. Zhang, and R. West........................................77

Reactions of Electrochemically Generated Thianthrene Radical Cation with Ketones and Alkenes
A. Houamam, D. D. M. Wayner, and D. Shukla................................81

Direct and Catalytic Reduction of 2,6-Bis(chloromethyl)pyridine at Carbon Cathodes in Acetonitrile
C. Ji, M. S. Mubarak, D. G. Peters, J. A. Karty, and J. P. Reilly...........85
Nickel- and Chromium-Catalyzed Electrochemical Coupling of Aryl Halides with Arenecarboxaldehyde
M. Durandetti, J.-Y. Nédélec, and J. Périchon .............................................. 89

Electrochemical Behavior of Metal-Substituted Heteropolytungstates and Their Application as Alcohol Oxidation Electrocatalysts
M. Sadakane, M. T. Pope, and E. Steckhan ..................................................... 93

Redox Initiated Cobalt(I) Mediated C–C Bond Formation Reactions
G. Hilt and S. Lüers ......................................................................................... 97

Poly(pyrroles) Grafted by Chiral Side Chains: New Results on the Effect of Substituents of the Enantioselective Properties in the Doped as well as in the Undoped State of the Polymer Films
S. Pleus ........................................................................................................... 101

Stereoselectivity of Anodically Induced Radical Coupling Reactions
P. Q. Nguyen and H. J. Schäfer ...................................................................... 105

Enantioselective Enzymatic Oxidation with Indirect Electrochemical NAD⁺ Regeneration
I. Schroeder, D. Vasić-Rački, C. Wandrey, and A. Liese ................................... 109

Electrochemistry of –N(CF₃)₂ Compounds
N. V. Ignat'ev, V. Hilaris, U. Heider, A. Kühner, M. Schmidt, A. Kucherina, and P. Sartori ................................................................. 113

Electrochemical Studies of Diels-Alder Reactions in a Room-Temperature Molten Salt
G. T. Cheek and W. E. O'Grady ..................................................................... 117

Electrochemical Reactions in the Precoat-Layer-Cell
C. Merk, G. Huber, and A. Weiper-Idelmann .................................................. 121

Electrochemical Behavior of 6,6'-Bis(2-hydroxyphenyl)-2,2'-bipyridine and Its Complexes with Nickel(II) and Cobalt(II)
D. M. Goken and D. G. Peters ....................................................................... 125

Addition of Water, Hydroxide Ions and Alcohols to Some Double Bonds
P. Zuman ........................................................................................................ 129

Evidence of N–N Single Bond as a Hindrance of Electron Delocalization in Cyclic and Acyclic Azines
J. Ludvik, J. Urban, J. Jirkovský, and P. Zuman ............................................ 132

Electrochemical Studies of the Fries Rearrangement in a Room-Temperature Molten Salt
G. Cheek ......................................................................................................... 136
A Comparison of the Electrochemical Behavior of Ortho and Para Nitro Dioxanes and Dioxolanes on Mercury and High Surface Area (Porous) Electrodes
J. Lessard, J. M. Chapuzet, R. Labrecque, G. Martin, S. Antonello, and F. Maran.................................................................140

Major vs. Minor Electronic Substituent Effects. Influence on the Kinetics of Radical Anion Reactions
M. F. Nielsen.....................................................................................................................144

Nonadiabatic Dissociative Electron Transfer to Peresters
S. Antonello, F. Maran, F. Formaggio, A. Moretto, and C. Toniolo...........148

Dependence of the Mechanism of the Homogeneous Reduction of the Endoperoxide of 9,10-Diphenylanthracene on the Redox Properties of the Donor
R. L. Donkers and M. S. Workentin.................................................................152

Stability and Persistency of Radical Anions of Spirobifluorene Derivatives
G. Fioravanti, L. Mattiello, and L. Rampazzo.................................156

Electrochemical Sensing of Halides with New Boronic Ester-Substituted Redox-active Receptors in Solution and Attached to an Electrode Surface
B. Fabre, M. Nicolas, and J. Simonet.............................................................160

Designing Air and Water Stable n-Dopable Model Compounds and Polymers II
M. D. Alexander, Jr., C. E. Specker, and D. S. Dudis...............................164

Polyamine Precursors Synthesis on Conducting Polythiophenes. A New Solid-phase Methodology Involving Electrons as S–N Bond Cleavage Reagent
J.-F. Pilard, G. Marchand, S. Dubey, and J. Simonet..............................168

Author Index.................................................................................................................171

Subject Index..............................................................................................................174
