

## **TABLE OF CONTENTS**

<b>PREFACE</b>	<b>iii</b>
<b>ORGANIZERS</b>	<b>v</b>
<b>I OXIDE WEAR-OUT, RELIABILITY, STRESS AND INTERFACES</b>	
<b>A Review of Oxide Wearout, Breakdown, and Reliability</b>	<b>D. Dumin</b> <b>3</b>
<b>Surface And Interface Study Of Ion Beam Deposited Silicon oxide Thin films</b>	<b>Heinz D. Wazenboeck</b> <b>Emmerich Bertagnolli</b> <b>Bernhard Basnar</b> <b>Juergen Smoliner</b> <b>Martin Gritsch</b> <b>Herbert Hutter</b> <b>Josef Brenner</b> <b>C. Tomastik</b> <b>Herbert Storri</b> <b>44</b>
<b>Study of Inversion Layer Hole Mobility In p-MOSFET During High-field Stressing</b>	<b>R. Jarawal</b> <b>D. Misra</b> <b>52</b>
<b>Two Limiting Thicknesses Of The Ultrathin Gate Oxide</b>	<b>Samares Kar</b> <b>60</b>
<b>II SiO<sub>2</sub> STRESS AND INTERFACES</b>	
<b>The Connection Between oxide leakage currents and Si/SiO<sub>2</sub> Interface Trap Generation</b>	<b>P. M. Lenahan</b> <b>74</b>
<b>Charging Damage During Plasma Enhanced Dielectric Deposition</b>	<b>K. Cheung</b> <b>80</b>
<b>Kinetics and Mechanisms of Organic Contaminant Interactions at Silicon Surfaces in High Temperature Processes</b>	<b>N. Rana</b> <b>P. Raghu</b> <b>F. Shadman</b> <b>88</b>
<b>III SiO<sub>2</sub> FILMS AND PROPERTIES</b>	
<b>Remote Plasma Deposited Gate Dielectrics on Si and SiGe MOSFETS</b>	<b>T. Ngai</b> <b>R. Sharma</b> <b>J. Fretwell</b> <b>X. Chen</b> <b>J. Chen</b> <b>W. Brookover</b> <b>S. Banerjee</b> <b>95</b>
<b>Rapid Thermal Processes of High Permittivity Films on Silicon for ULSI Gate Dielectrics Applications</b>	<b>S. P. Tay</b> <b>R. Sharangpani</b> <b>Y. Z. Hu</b> <b>109</b>

<b>Processing of Thick Thermal Gate Oxides in Trenchs</b>	<b>C . T . Wu R . Ridley G . Dolny T . Grebs J . Hao S . Suliman B . Venkataraman O . Awadelkarim R . Williams P . Roman J . Ruzyllo</b>	<b>127</b>
<b>Electrical Properties of SiO<sub>2</sub> -Films Prepared by VUV Chemical Vapor Deposition</b>	<b>Y . Motoyama J . Miyano K . Tosikawa Y . Yagi K . Kurosawa A . Yokotani W . Sasaki</b>	<b>134</b>
<b>SiO<sub>2</sub> Film Deposition on Different Substrate Materials by Photo- CVD Using Vacuum Ultraviolet Radiation</b>	<b>J . Miyano K . Toshikawa Y . Motoyama K . Kurosawa</b>	<b>140</b>
<b>IV SILICON NITRIDES/ OXYNITRIDES I</b>		
<b>Low Energy Ion Irradiation of Silicon: Compound Formation and Segregation of Impurities</b>	<b>M . Petracic J . S . Williams P . N . K . Deenapanray</b>	<b>147</b>
<b>Characteristics of Silicon Oxynitrides Made By ECR Plasmas</b>	<b>J . A . Diniz P . J . Tatsch J . Swart</b>	<b>156</b>
<b>Radiation Hardening of Oxynitrides Formed By Low Nitrogen Implantation into Silicon Prior to Oxidation</b>	<b>J . A . Diniz J . Godoy Fo P . J . Tatsch J . Swart</b>	<b>163</b>
<b>V SILICON NITRIDES/ OXYNITRIDES II</b>		
<b>Material and Process Considerations of Ultra thin Silicon (Oxy) Nitride Films Grown on Silicon and SiO<sub>2</sub> Surfaces</b>	<b>C . P . D'Emic E . P . Gusev K . K . Chan T . Zabel M . Copel R . Murphy P . Kozolowski J . Newbury</b>	<b>174</b>

<b>Silicon OxyNitride: A Versatile Material for Integrated Optics Application</b>	<b>K . Worhoff A . Driessens P . V . Lambeck</b>	<b>191</b>
<b>Characterization of Silicon Oxynitride Thin Films Deposited By ECR-PECVD</b>	<b>C . Simionescu J . Wojcik H . K . Haugen J . A . Davies P . Mascher</b>	<b>206</b>
<b>VI SILICON NITRIDES/ OXYNITRIDES III</b>		
<b>Characterization of Low- Temperature Magnetoplasma- Grown Si Oxynitride and Si Oxide</b>	<b>H . Ikoma</b>	<b>214</b>
<b>Advances in Single Wafer Chemical Deposition of Oxide and Nitride films</b>	<b>W . Palmer Z . Gabric</b>	<b>227</b>
<b>High Integrity Direct Oxidation/Nitridation at Low Temperatures Using Radicals</b>	<b>T . Ohmi S . Sugawa M . Hirayama</b>	<b>241</b>
<b>SILICON NITRIDE</b>		
<b>Thermally Induced Stress Changes in High Density Plasma Deposited Silicon Nitride Films</b>	<b>R . E . Shah H . Baumann D . Serries M . Mikulla R . Keiffer</b>	<b>253</b>
<b>Effect of Oxygen in Deposited Ultra Thin Silicon Nitride Film on Electrical Properties</b>	<b>K . Muraoka K . Kurihara</b>	<b>264</b>
<b>Influence of Low- energy argon Ion Bombardment and Vacuum Annealing on the Silicon Nitride Surface Properties</b>	<b>I . P . Petrenko V . A . Gritsenko L . M . Logvinsky H . Wong</b>	<b>274</b>
<b>AUTHORS INDEX</b>		<b>282</b>
<b>SUBJECT INDEX</b>		<b>284</b>
