

Table of Contents

Overview

Fundamental Research and Development Challenges in Polymer Electrolyte Fuel Cell Technology <i>H. Gasteiger and M. Mathias (General Motors)</i>	1
--	---

Electrocatalysis

Advanced Electrode Development at W. L. Gore and Associates, Inc. Vacuum Coating Catalyzed/Inking Hybrid Electrodes <i>C. Cavalca, M. Murthy, D. Frydrych (W.L. Gore and Associates, Inc.) and J. Arps and Kevin Walter (Southwest Research Institute)</i>	25
Kinetic Model of Platinum Dissolution in PEM Fuel Cells <i>R. Darling and J. Meyers (UTC Fuel Cells)</i>	44
Effect of Water Content on Oxygen Reduction Reaction (ORR) Kinetics on Supported Pt Catalyst: a Rotating Disk Electrode Study <i>R. Urian, V. Srinivasamurthi, and S. Mukerjee (Northeastern University)</i>	54
Low-Platinum Tin-Oxide Electrocatalysts for PEM Fuel Cell Cathodes <i>N. Ugarte and K. Swider-Lyons (Naval Research Laboratory)</i>	67
Comparison of Modeling and Experimental Results of Modified Pt-based PEMFC Cathode- catalysts <i>E. Puhakka (VTT Processes) , U. Koponen and M. Bergelin (Abo Akademi) and J. Keskinen, H. Kumpulainen, T. Peltonen, and M. Valkiainen (VTT Processes)</i>	74
Non-Noble Metal Catalysts for PEM Oxygen Reduction based on Sol Gel Derived Cobalt Nitrogen Compounds <i>A.S. Sirk, V. Birss (University of Calgary), and S. Campbell (Ballard Power Systems)</i>	89
ORR Kinetics of Pt Based Alloys Using a RDE and a Correlation with their Fuel Cell Performance <i>V. Srinivasamurthi, R. Urian, and S. Mukerjee (Northeastern University)</i>	99
Oxygen Reduction and Transport Characteristics at a Platinum/Sulfonated Poly ether sulfone Membrane Interface <i>L. Zhang, Chengsong Ma and S. Mukerjee (Northeastern University)</i>	111

Influence of Ammonium on Nafion117 Membranes <i>R. Halseid, P.J.S. Vie, and R. Tunold (Norwegian University of Science and Technology)</i>	127
The Effect of Relatively High Ammonia Concentrations in Reformate on PEMFC Performance <i>H.J. Soto, W.-K. Lee, J.W. Van Zee (University of South Carolina), and M. Murthy (W.L. Gore Associates, Inc.)</i>	139
Rates of Adsorption, Desorption, and Oxidation of CO on PEM Electrodes <i>B. Lakshmanan and J. Weidner (University of South Carolina)</i>	149
Maximization of CO Tolerance of PEMFC Systems Using Reconfigured Anodes <i>P.A. Adcock, S. Pacheco, E. Brosha (Los Alamos National Laboratory), T.A. Zawodzinski (Case Western Reserve University), and F.A. Uribe (Los Alamos National Laboratory)</i>	159
 <i>Transport Processes and Spatial Distributions</i> 	
Porous Flow Plate with Interdigitated Flow Fields for PEM Fuel Cells <i>J. Yi, J. Puhalski, and C. King (UTC Fuel Cells)</i>	174
In Situ Water Distribution Measurements in an Operating PEM Fuel Cell <i>M. Mench, Q. Dong, and C.-Y. Wang (Pennsylvania State University)</i>	183
Investigation of Gas Diffusion Media Using CFD Modeling <i>U. Beuscher, G. Rusch (W.L. Gore and Associates. Inc.), S. Shimpalee, and J. Van Zee (University of South Carolina)</i>	198
Spatial Distribution Of The CO Transient Response of a PEFC <i>G. Bender (Los Alamos National Laboratory)</i>	212
Transient and Steady State Current Density Distribution Measurements in a Polymer Electrolyte Fuel Cell <i>M. Mench and C.-Y. Wang (Pennsylvania State University) and M. Ishikawa (CD-adapto, Japan)</i>	220
Measurement of the Distributions of Local Current Density and Local Ionic Resistance of PEFCs <i>Y. Morimoto, T. Suzuki, and H. Yamada (Toyota Central R and D Labs., Inc.)</i>	248
Probing Electrode Structure Using Electrochemical Impedance Spectroscopy <i>M. Murthy (W.L. Gore and Associates, Inc.)</i>	257

Characterization of Gas Diffusion Layers for PEMFCs <i>M. Williams, E. Begg, L. Bonville, H. Kinz, and J. Fenton (University of Connecticut)</i>	270
The Dilution Effect of Reformate Components on PEMFC Performance <i>T. Gu, W. Lee, J. Van Zee (University of South Carolina), and M. Murthy (W.L. Gore and Associates, Inc.)</i>	287
Electrolyte Resistance Measurement in the Catalyst Layers of Polymer Electrolyte Fuel Cells using Electrochemical Impedance Spectroscopy <i>R. Makharia, M. Mathias, D. Baker, J. Iaculli, and M. Murphy, (General Motors)</i>	298
Electrocatalytic Layer Microstructure-Resistance Relationship <i>V. Stanic (Teledyne Energy Systems, Inc)</i>	315
Oxygen Transport in Composite Biocathodes <i>S. Calabrese Barton (Columbia University)</i>	324
Localized Electrochemical Impedance Measurements on a Single Channel of a Polymer Electrolyte Fuel Cell <i>D. Brett, S. Atkins, N. Brandon, V. Vesovic, N. Vasileiadis, and A. Kucernak (Imperial College of Science, Technology, and Medicine)</i>	336
Prediction of Transient Response for a 25-cm ² PEM Fuel Cell <i>S. Kim, W.-K. Lee, S. Shimpalee, and J. Van Zee (University of South Carolina)</i>	349
 <i>Proton Conducting Membranes</i>	
Physical Model of Transport in Polymer-Electrolyte Membranes <i>A. Weber and J. Newman (University of California - Berkeley)</i>	361
Simple Mathematical Model for Water Diffusion in Nafion Membranes <i>J. St-Pierre (Ballard Power Systems)</i>	373
A New Proton Conductive Membrane - Tungsten Peroxo Complex Doped Sol-Gel Organic/Inorganic Nanocomposite Polymer <i>H. Nakajima and I. Honma (National Institute of Advanced Industrial Science and Technology)</i>	388
Proton Transport Characteristics for Select PEM Fuel Cell Interfaces Designed for Elevated Temperature Operation: Effect of Relative Humidity <i>C. Ma, L. Zhang and S. Mukerjee (Northeastern University)</i>	400

Novel Composite Membrane-Electrode Assembly for High-Temperature PEMFC <i>C.-Y. Yuh, P. Patel, R. Kopp, S. Katikaneni (Fuel Cell Energy, Inc.), and S. Grot (Ion Power, Inc.)</i>	416
Performance of High Temperature Proton Exchange Membrane Fuel Cells Under Off Design Conditions <i>V. Ramani, A. Smirnova, H. Kunz, and J. Fenton (University of Connecticut)</i>	426
CO Tolerance in PBI/H ₃ PO ₄ Polymer Electrolyte Fuel Cells <i>J. Wainright, J. Staser, and R. Savinell (Case Western Reserve University)</i>	440
<i>Direct Methanol Fuel Cells</i>	
Electrochemical and XRD Characterization of Pt-Ru Blacks for DMFC Anodes <i>C. Eickes, E. Brosha, F. Garzon, G. Purdy, P. Zelenay (Los Alamos National Laboratory), T. Morita, and D. Thompsett (Johnson Matthey Technology Centre)</i>	450
Novel Method for The Estimation of the Electroactive Pt Area <i>C. Bock and B. MacDougall (NRC, Canada)</i>	468
A Six-Cell 'Single-Cell' Stack for Stack Diagnostics <i>B. Pivovar, F. Le Scornet, C. Zawodzinski, G. Purdy, M. Wilson, and P. Zelenay (Los Alamos National Laboratory)</i>	481
Optimization of Carbon-Supported Platinum Cathode Catalysts for DMFC Operation <i>Y. Zhu, E. Brosha, and P. Zelenay (Los Alamos National Laboratory)</i>	490
Effect of Fabrication Technique on Direct Methanol Fuel Cells Designed to Operate at Low Airflow <i>T.I. Valdez and S.R. Narayanan (Jet Propulsion Laboratory)</i>	506
Preparation of Platinum Catalyst Layers for DMFC Cathodes by Pulsed Electrodeposition <i>K. Wippermann, K. Klafki, J. Mergel (Forschungszentrum Julich GmbH), M.-S. Löffler, H. Natter, and R. Hempelmann (University of Saarbrücken)</i>	518
The Effect of BPSH Post Treatment on DMFC Performance and Properties <i>M. Hickner, B. Pivovar (Los Alamos National Laboratory), Y. Kim, J. McGrath (Virginia Polytechnic Institute and State University), and P. Zelenay (Los Alamos National Laboratory)</i>	530

Microreactor Studies on the Effect of Temperature on the Reaction Pathways
of Methanol Electrooxidation on Pt Catalysts
N. Arvindan and E. Stuve (University of Washington)

541
