

TABLE OF CONTENTS

<i>Preface</i>	<i>iii</i>
<i>Conference Organization</i>	<i>vii</i>
Section I	
Technology Overview	1
1. Status and Future of Magnetic Data Storage Technology <i>M. H. Kryder</i>	3
2. Tunneling Magnetoresistance Heads for Magnetic Recording <i>T. Lin, D. Mauri, P. Rice</i>	26
3. Review on Recent Perpendicular Recording Devices and Their Performance <i>K. Ouchi</i>	41
4. Trends and Process Considerations for Making New Generations of Magnetic Recording Heads (A Single Turn Perpendicular Alternative) <i>E. Johns, S. Batra, M. Covington, B. Crue, A. Eckert, P. Van der Heijden, J. Jayashankar, K. Mountfield, U. Tran, X-M. Yang, R. Rottmayer</i>	54
5. Electrodeposition of Co-Pt – Films and Patterns with Perpendicular Anisotropy <i>I. Zana, G. Zangari</i>	77
6. Advances in European Magnetic MEMS Technology <i>H. H. Gatzel</i>	90
Section II	
Magnetic MEMS Technology	109
7. Development of Electroplated Magnetic Materials for MEMS <i>N.V. Myung, D.-Y. Park, P.T.A. Sumodjo</i>	111
8. Optimizing the Magnetic Properties of Electroplated Permalloy for Flux Guides in Micromotors <i>M. Föhse, H. H. Gatzel</i>	125
9. Ni Electroplating in SU-8 Micromolds for Fabricating Self Supporting Microstructures <i>T. Kohlmeier, H. H. Gatzel</i>	137
10. Small Actuator for Large Capacity. A MEMS Microactuator for Hard-Disk Drive Tracking Servo <i>T. Hirano, H. Yang, S. Pattanaik, M. White, S. Araya</i>	149
11. A Large-Displacement Electromagnetic MEMS Actuation System <i>A. L. Sidman, M. Neal, J. Borski</i>	157

12. Ferromagnetic MEMS Arrays for Reconfigurable Frequency-Selective Surfaces
J. Zendejas, J. Gianvittorio, B. Yoo, Y. Rahmat-Samii, K. Nobe, J.W. Judy 171
13. Technology for the Development of Magnetic Micro Stir-bar Mixers for Fluid Lab-on-a-chip Applications
C. Liu, K.S. Ryu, L.-H. Lu 188
14. Effect of Etch Holes on the Performance of Ferromagnetic MEMS
W.-J. Ouborg, N. Myung, K. Nobe, J.W. Judy 201
15. Three Dimensional PDMA Assembly Method and Its Application
C. Liu, J. Chen, J. Zou, Z. Fan 214
16. Silicon Optical MEMS: Three Dimensional Micromachining and Integration
K. Hane, M. Sasaki, Y. Kanamori 229

Section III

Plated Materials for Magnetic Heads 239

17. The Electrodeposition Conditions of CoNiFe Films, Crystal Structure, and Evaluation of Magnetic Moments
M. Saito, K. Ohashi 241
18. High Moment Electrodeposited CoNiFe
C. Bonhôte, M. Ramasubramanian, E.P. Velasco, E. I. Cooper, L. T. Romankiw 254
19. Magnetic Properties of Electroplated CoNiFe Alloys
J.A. Medina, T. Jiang, T. Dinan 262
20. Pulse Plating of Soft High Magnetic Moment Materials - Properties and Application
S.R. Brankovic, K. Sendur, T.J. Klemmer, X. Yang, E.C. Johns 269
21. Electrodeposition of Soft CoFeCr Films with High Magnetic Saturation and High Resistivity
C. Locatelli-Dieppedale, D. Comte 281
22. Development of High-performance Soft Magnetic Thin Films by Electroless Deposition and their Application to Magnetic Recording Devices
T. Osaka, T. Yokoshima 290
23. Electrodeposition and Performance Evaluation of High Moment Nickel-Iron Films
M. Ramasubramanian, J. Lam, A. Hixson-Goldsmith, A. Medina, T. Dinan, N. Robertson, T. Harris, S. Yuan 298

24.	Domain Studies of Electroplated High Moment CoFe and Ni ₄₅ Fe ₅₅ on Test Structures <i>H. Xu, J. Heidmann, Y. Hsu</i>	307
25.	Electroplated 2.4 Tesla CoFe Films <i>C. Bonhôte, H. Xu, E. I. Cooper, L. T. Romankiw</i>	319
26.	In Situ Surface Measurements and Rotating Cylinder Hull Cell - A Powerful Combination of Methods for Investigation of Iron Group Metal Alloys <i>P. Kern, C. Bonhôte, L. T. Romankiw</i>	328
27.	Pulse Plating of High Moment CoFe Thin Films <i>C.-P. Chen, K. Lin, J.-W. Chang</i>	351
28.	Effect of Carbon Inclusion on Properties of Electrodeposited CoNiFeMo Thin Films <i>T. Yokoshima, A. Kawashima, T. Nakanishi, T. Osaka, M. Saito, K. Ohashi</i>	365
29.	Effect of Magnetic Field on NiFe Electrodeposition <i>I. Tabakovic, S. Riemer, V. Vas'ko, V. Sapozhnikov, M. Kief</i>	376
30.	Models for Roughness Evolution in Magnetic Film Electrodeposition with and without Additives <i>M. Haataja, D.J. Srolovitz, A.B. Bocarsly</i>	386
31.	The Inhibition of Anomalous Codeposition of Iron-Nickel Deposits Using Pulse-Reverse Electroplating <i>C.-C. Hu, P. Tsay</i>	398
32.	Electrodeposition of Magnetic Thin Films of Cobalt Based V and Pt Alloys <i>B.Y. Yoo, M. Schwartz, P.T.A. Sumodjo, D.Y. Park, N.V. Myung, K. Nobe</i>	405
33.	A Model to Describe Pulsed Electrodeposition of GMR FeCoNiCu Alloys <i>Q. Huang, E.J. Podlaha</i>	414
34.	Electrodeposition of Iron from Ferrous Sulfate and Ferrous Chloride Solutions: Part I - Cyclic Voltammetry <i>D. Grujicic, B. Pesic</i>	426
35.	Nano-oxidation of Ferromagnetic Thin Films as Direct Surface Modification Using AFM <i>Y. Takemura, J.-I. Shirakashi</i>	444
36.	Enhanced Magnetoresistance in Co/Cu Multilayers Due to the Insertion of Ni Layers <i>K. Tanahashi, T. Endo, T. Sugimoto, T. Sasaki, S. Shinriki, A. Kanemoto, M. Eguti, K. Motoi, K. Imai, K. Suzuki, T. Sawada, N. Kimura</i>	450

Section IV	
Magnetic Structures, Fabrication and Properties	459
37. Electrodeposition of FeCo Nanowires <i>I. Shao, R. Cammarata, P.C. Searson</i>	461
38. Fabrication of CoNiP Dot Arrays for Patterned Magnetic Recording Media with Electroless Deposition Process <i>J. Kawaji, F. Kitaizumi, T. Homma, T. Osaka</i>	473
39. FePt Nanoparticle-Assembly for Magnetic Recording Media <i>Y. Kitamoto, H. Sakuma, A. Jogo, T. Taniyama, Y. Yamazaki, H. Nishio, H. Yamamoto</i>	483
40. Characterization of Amorphous Ni-P Coating by Small Angle X-Ray Scattering <i>D. Tatchev, R. Kranold, S. Armyanov</i>	491
41. Factors Affecting the Electroless Deposition of Ni-Cu-P Coatings <i>J. Georgieva, S. Armyanov</i>	503
42. Electromigration of GMR Recording Heads <i>C. Luo, S. Kao, J.-W. Chang</i>	515
43. Reliability of GMR Recording Heads <i>C. Luo, S. Kao, J.-W. Chang</i>	524
44. Using Electrochemical Impedance Spectroscopy to Measure Corrosion Protection of Thin-Film Magnetic Recording Disks <i>M.N. Amaria</i>	532
45. Ultrahigh Frequency Ferrite Films and Ferrite/Metal Composites Prepared by Wet Chemical Process <i>M. Abe</i>	545
46. High Rate Deposition (>60 nm/min) of Highly Permeable Ni-Zn Ferrite Films from Aqueous Solutions <i>N. Matsushita, T. Nakamura, M. Abe</i>	554
Section V	
Electrodeposition of Alloys	561
47. Effect of Saccharin Concentration on the Microstructure of the Electrodeposited Ni-Fe <i>S.-H. Kim, T. Kang, H.-J. Sohn, Y.-C. Joo, Y.-W. Kim, T.-H. Yim, H.-Y. Lee</i>	563
48. Electrodeposition of Platinum-Iridium Alloy on Nickel-Base Single-Crystal Superalloy TMS-75 <i>F. Wu, H. Murakami, Y. Yamabe-Mitarai, H. Harada, Y. Yamamoto</i>	569

49.	The Analysis of The Zinc and Iron Group Metal Alloy Codeposition Mechanism Using an EQCM <i>H. Hayashi, S.-H. Matsuda, T. Katase</i>	576
50.	Studies of Electrodeposited Zn-Ni-Cu as a Replacement for Cadmium Coatings <i>S. P. Kumaraguru, B. Veeraraghavan, B. Popov</i>	587
51.	Zn-Ni-P Deposits as a Replacement for Cadmium Coatings <i>B. Veeraraghavan, S. Prabu, B. Haran, B. Popov</i>	601
52.	In Situ Scanning Tunneling Microscopy: Nanostructuring of Solid State Surfaces and Determination of Surface Properties <i>W. Schindler, P. Hugelmann, M. Hugelmann</i>	615
53.	In Situ Electrochemical Atomic Force Microscopy of Surface Alloying at the Au(100)/Cd ²⁺ Interface <i>R. Vidu, N. Hirai, S. Hara</i>	628
54.	Electrodeposition of Aluminum-Vanadium Alloys from the Aluminum Chloride-1-Ethyl-3-Methylimidazolium Chloride Molten Salt <i>T. Tsuda, C.L. Hussey</i>	637
55.	Electrodeposition of Tm Alloy Films in Dimethylsulfoxide <i>D. Yuan, G. Liu</i>	649
56.	A Comparison of Direct and Pulse Plating Techniques from Aprotic Non-Aqueous Solutions and Aqueous Solutions for the Preparation of Various Pt/Ru Alloys <i>J. H. Thomas, D.A. Buttry</i>	656
57.	Phase Stability of Electrodeposited Alloys: the Case of IB Metals - Sn Alloys <i>A. Vicenzo, M. Bestetti, L. Nobili, P. L. Cavallotti</i>	661
58.	Electrodeposition of White Gold Alloys for Decorative Applications <i>A. Vicenzo, L. Vonella, M. Rea, M. Bestetti, P. L. Cavallotti</i>	672
59.	Electrodeposition of Sacrificial Copper-Manganese Alloy Coatings and their Properties <i>J. Gong, G. Wei, J.A. Barnard, G. Zangari</i>	684
60.	Electrodeposition of Ni-Cu- γ -Al ₂ O ₃ Alloys into Deep Recesses <i>A. Panda, E.J. Podlaha</i>	696
