

TABLE OF CONTENTS

Dynamical Aspects of Electrochemical Supercapacitor Behavior <i>B. E. Conway and W. G. Pell</i>	1
Cycling Characteristics and Electrochemical Impedance Spectroscopy Study of Carbon/Carbon Supercapacitor in Organic Electrolyte <i>P. L. Taberna, P. Simon and J-F. Fauvarque</i>	19
Electrochemical Capacitor Cell Voltage Balance At Float-Voltage <i>J. R. Miller and S. M. Butler</i>	28
Proton Conducting Gel Electrolytes Based on Poly(ethylene oxide)-modified Polymethacrylate Doped with Inorganic Acids <i>M. Morita, J. Qiao, N. Yoshimoto, and M. Ishikawa</i>	42
PVdF-HFP Gel Electrolytes with an Asymmetric Ammonium Salt for Electric Double Layer Capacitors <i>M. Ishikawa, S. Tsumeda, M. Morita and Y. Ando</i>	48
Development of Aqueous Polymeric Gel Electrolytes for Pseudocapacitors <i>H.-J. Kim and S.-G. Park</i>	56
Nanocarbon Electrodes for Symmetric and Hybrid Capacitors <i>D. W. Firsich and S. M. Lipka</i>	63
Activated Carbon and Poly(3-methylthiophene)-Based Hybrid Supercapacitor-Basic Studies <i>M. Mastragostino, F. Soavi, C. Arbizzani, and A. Balducci</i>	69
Performance of Obliquely Deposited Thin Films in Electrochemical Capacitors <i>J. N. Broughton and M. J. Brett</i>	81
Iron Oxide Supercapacitors <i>N.-L. Wu, Y.-P. Lan, C.-Y. Han, S.-Y. Wang and L.-R. Shiue</i>	95
Development of Oxide Electrodes for Electrochemical Supercapacitors <i>Y. Takasu, M. Shimizu, T. Shibusaki, T. Ohnuma, W. Sugimoto and Y. Yamamoto</i> .	107
Ultra Thin Nickel Electrodes for Hybrid Supercapacitors <i>M. Bursell, A. Lundblad, and P. Bjornbom</i>	116
Assymetric Type Electrochemical Capacitors A. I. Beliakov	121

The Nonaqueous Asymmetric Hybrid Technology: Materials, Electrochemical Properties and Performance in Plastic Cells <i>G. G. Amatucci, F. Badway, J. Shelburne, A. Gozdz, I. Plitz, A. DuPasquier and S. Menocal</i>	140
Use of Electrode-bonded Paper Separators in Non-aqueous Electric Double-layer Capacitors and Li-ion Batteries <i>A. Du Pasquier, A. Gozdz, I. Plitz, and J. Shelburne</i>	153
Hybrid Capacitors using Organic Electrolyte <i>T. Morimoto, M. Tsushima, G. Cha, and Y. Che</i>	161
A Hybrid Electrochemical Capacitor with Asymmetric Electrodes and Aqueous Electrolyte <i>J. H. Kim, C. S. Jin and K. H. Shin</i>	172
The Modification of Amorphous Manganese Oxide Electrode for Electrochemical Pseudocapacitor <i>H. Y. Lee, H. S. Kim, and H. Y. Lee</i>	182
MnO ₂ as Electrode Material for Electrochemical Capacitors <i>R. N. Reddy and R. G. Reddy</i>	197
The Limitation of Energy Density for Battery/Double Layer Capacitor Hybrid Cell <i>J. P. Zheng</i>	205
A Mathematical Model of RuO ₂ /Carbon Composite Electrode for Supercapacitors <i>H. Kim and B. N. Popov</i>	224
Performance Testing of Selected Commercial Upercapacitors, <i>R. B. Wright, D. K. Jamison, T. Q. Duong and R. A. Sutula</i>	240
Hybrid Supercapacitors – From Laboratory to Industrial Development, <i>A. Laforgue, P. Simon, J. F. Fuavarque, M. Conte, J. F. Sarrau and P. Lailier</i> ...	266
Evaluation of CO ₂ Emission on Supercapacitor System as Energy Storage Device for Hybrid Electric Vehicle <i>K. Okajima, T. Toya and M. Sudoh</i>	272
Nano-Composites Based on Carbon/p-Stacked Supramolecules for Supercapacitors <i>S. Suematsu, Y. Nakajima and K. Naoi</i>	282
In-situ Ru L _{II} and L _{III} -edge X-ray Absorption Near Edge Structure of Electrodeposited Ruthenium Dioxide Films <i>I. C. Stefan, Y. Mo, M. R. Antonio and D. Scherson</i>	291
Proton Insertion in Hydrous Ruthenium Oxides <i>J. P. Zheng, Z. R. Ma, Y. Xin and R. Q. Fu</i>	297

AC Impedance Spectra of Activated Carbon at Charged States: Effect of Pore Size and Ion Size <i>Y-H. Jung, S.-C. Park, E.-S. Kim, S.-M. Kim and Y.-H Kim</i>	309
Tantalum Oxide-Ruthenium Oxide Hybrid Capacitors <i>J. P. Zheng, T. Y. Chang, X. Wang, D. A. Evans, and S. L. Robinson</i>	322
CVD Synthesis of Carbon Nanotubes as Active Materials for Electrochemical Capacitors <i>R. P. Merritt and S. M. Lipka</i>	332
Energy and Power of Titanium Electrolytic Capacitors <i>D. McGervey and G. Welsch</i>	343
Growth of Titanium Sponge on Titanium Substrate for Capacitor Anodes <i>J. Ki, J. Chung, D. McGervey and G. Welsch</i>	354
Anodic Formation of TiO ₂ Dielectric Films <i>B. Chou, D. McGervey, U. Landau, and G. Welsch</i>	365
Anodic TiO ₂ Films Doped with Alkali-Earth Oxides <i>R. Jain, B. Chou, D. McGervey, J. Chung and G. Welsch</i>	382
Characterization of Electrochemically Formed Anodic Oxide Films on Titanium <i>T. Kalapos, U. Landau, and G. Welsch</i>	397
