

TABLE OF CONTENTS

PREFACE	iii
---------------	-----

Quantum Transport and Novel Nano-Systems for Electronics

Electrostatic Trapping and Measurements on DNA Oligomers and Graphitized Carbon Nanoparticles	3
<i>A. Bezryadin*, D. Porath, and C. Dekker</i>	
Coherent Spin injection across a ferromagnet/semiconductor interface in an electrochemically self assembled nanowire array	7
<i>S. Datta, L. Menon, and S. Bandyopadhyay</i>	
Vertical Diatomic Artificial Quantum Dot Molecules	13
<i>D.G. Austing*, S. Sasaki, K. Muraki, Y. Tokura, K. Ono, S. Tarucha, M. Barranco, A. Emperador, M. Pi, and F. Garcias</i>	
Point Contact Conductance in Backgated Heterostructures	33
<i>Y. Hirayama* and Y. Tokura</i>	
Si _{1-x} Ge _x /Si Triple-Barrier RTD with a High Peak-to-Valley Ratio of 180 at room temperature	47
<i>Y. Suda</i>	
Some Fundamental Issues for Heterojunctions - Multipole - Electrode Hybrid Confinement	61
<i>R. Tsu</i>	
Time-dependent electric field on two electrons in vertically coupled quantum dots	67
<i>W. Ben Chouikha, S. Jaziri, and R. Bennaceur</i>	

Silicon Dots and Nanocrystals

Er Doping of Ordered Size Controlled Si Nanocrystals	83
<i>M. Schmidt, J. Heitmann, R. Scholz, V. Yu Timoshenko, M.G. Lisachenko and M. Zacharias</i>	
Synthesis and Size-control of Si Nanocrystals by SiO/SiO ₂ Superlattices	93
<i>J. Heitmann, R. Scholz, L. Yi, M. Schmidt, and M. Zacharias</i>	
3D Self Consistent Simulation of Charging Time Response in Silicon Nanocrystals Flash Memories	99
<i>J.S. de Sousa, A.V. Thean, and J.-P. Leburton</i>	
Observation of the Quasi-Direct Recombination in Nanocrystalline Silicon Dots by Reducing the Core Diameter	109
<i>K. Arai, J. Omachi, and S. Oda</i>	

Optics in Quantum Nanostructures

Semiconductor nanowires Controlled growth and novel properties	123
<i>Y. Wu and P. Yang*</i>	
Semiconductor Photonic Crystals	129
<i>S. Noda* and M. Imada</i>	
SiGe Planar Microcavities with Strain-Balanced SiGe/Si Distributed Bragg Reflectors	141
<i>K. Kawaguchi, K. Konishi, S. Koh, Y. Shiraki, and J. Zhang</i>	
Terahertz Emitters Based on Intersubband Transitions	147
<i>Q. Hu*, B.S. Williams, M.R. Melloch, and J.L. Reno</i>	
Photoluminescence in Single Nanometer-Thick Quantum Wells of Crystalline Silicon	159
<i>D.J. Lockwood, Z.H. Lu, and D. Grozea</i>	

Luminescence in Nanocrystals and Porous Si

Photoluminescence-Excitation, Fluorescence-Line-Narrowing and Circular-Polarized-Photo-Luminescence Studies of Colloidal PbSe Nanocrystals	169
<i>M. Brumer, A. Saschiuk, and E. Lifshitz</i>	
Photoelectrochemistry of Layers of ZnS:Mn ²⁺ Nanocrystals	175
<i>J.F. Suyver, A. Meijerink, and J.J. Kelly</i>	
(Electro)Luminescence of Solutions, Powders, and Layers of ZnSe:Cu Nanocrystals	185
<i>J.F. Suyver, J.J. Kelly, and A. Meijerink</i>	
Electroluminescence Stabilization of Nanocrystalline Porous Silicon Diodes . .	195
<i>N. Koshida, J. Kadokura, B. Gelloz, R. Boukherroub, D.M. Wayner, and D.J. Lockwood</i>	
Investigation into the Mechanism of Electroluminescence of Porous Silicon in Aqueous Solutions	203
<i>D.J. Blackwood and A.S.L. Chong</i>	

* **Invited Speaker**
