

# TABLE OF CONTENTS

Welcome to the SBMicro 2004	iii
Preface	v
Review Board	vii
<b>1- MODELING AND CHARACTERIZATION</b>	<b>1</b>
Electrothermal Limitations on the Current Density of High-Frequency Bipolar Transistors N. Nenadovic, L. K. Nanver, and J. W. Slotboom	3
Behavior of Graded Channel SOI Gate-All-Around NMOSFET Devices at High Temperatures C. D. G. dos Santos, M. A. Pavanello, J. A. Martino, D. Flandre, and J.-P. Raskin	9
Low-Frequency Noise in Deep-Submicron MOSFETs G. Wirth, J. Koh, R. da Silva, R. Thewes, R. Brederlow	15
Evaluation of the Channel Engineering Impact on the Analog Performance of Deep-Submicrometer Partially Depleted SOI MOSFETs at Low Temperatures M. A. Pavanello, J. A. Martino, E. Simoen, and C. Claeys	21
A Fully Analytical Continuous Model for Graded-Channel SOI MOSFET for Analog Applications M. Souza, M. A. Pavanello, B. Iñiguez, and D. Flandre	27
Extraction of MOSFET Effective Channel Length and Width Based on the Transconductance-to-Current Ratio A. I. A. Cunha, M. C. Schneider, C. Galup-Montoro, C. D. C. Caetano, and M. B. Machado	33
Analysis of Harmonic Distortion in Graded-Channel SOI MOSFETs at High Temperatures M. A. Pavanello, A. Cerdeira, J. A. Martino, M. A. Alemán, and D. Flandre	39
Improved Current Mirror Performance Using Graded-Channel Silicon-On-Insulator Devices in High Temperature Operation R. S. Ferreira, and M. A. Pavanello	45
Modeling the Impact of Discretized Donor Distribution for Ultra-Small Field Effect Transistors P. C. M. Machado, A. B. Aguiar Marques, and K. F. Vaz	51

An Improved Model for the Triangular SOI Misalignment Test Structure R. Giacomini, and J. A. Martino	57
Enhanced High-Current VBIC Model C.-J. Wei, J. Gering, and Y. A. Tkachenko	63
Unambiguous Extraction of Threshold Voltage Based on the ACM Model A. I. A. Cunha, M. C. Schneider, C. Galup-Montoro, C. D. C. Caetano, and M. B. Machado	69
One Mask Step a-Si/a-SiO <sub>x</sub> N <sub>y</sub> Thin Film Transistor K. F. Albertin, and I. Pereyra	75
<b>2- MEMS, SENSORS AND ACTUATORS</b>	81
NanoMEMS Systems on Chip ( <i>Invited</i> ) H. J. de Los Santos	83
Un-cooled Thermal Infrared Detector for Detection of Far-Infrared Radiation R. R. Neli, I. Doi, A. M. Melo, C. J. N. Arbex, M. B. P. Zakia, P. Kaufmann, J. A. Diniz, and J. W. Swart.	95
Micro-Electromechanical Simulation of a CMOS Pressure Sensor F. Fruett, V. Garcia, and R. Pavanello	101
Polymeric Corrugated Membranes of PMMA Fabricated by Micro-Casting Technique for MOEMS and Optical Applications E. Y. Arashiro, and M. N. P. Carreño	107
Stress Analysis of Vertical LPCVD Thick Poly-Si by Micro-Raman Spectroscopy for MEMS Applications C. Scoralick Júnior, I. Doi, R. C. Teixeira, J. A. Diniz, and J. W. Swart	113
Suspended Membranes Made by Silicon Nitride Deposited by ECR-CVD C. Biasotto, B. Monte, R. R. Neli, A. C. S. Ramos, J. A. Diniz, S. A. Moshkalyov, I. Doi, and J. W. Swart.	119
Controlled Motion in Microbridges of Silicon Carbide Obtained by PECVD G. Rehder, and M. N. P. Carreño	125

<b>3- NANOTECHNOLOGY</b>	131
Modeling Nanoelectronic Devices in Circuit Theory: The Single-Electron Tunneling Junction ( <i>Invited</i> )	133
J. Hoekstra	
Single-Electron Winner-Take-All Macro Block for Large-Scale Integrated Neural Networks	145
J. G. Guimaraes, L. M. Nobrega, and J. C. da Costa	
Simulation of Dissipative Electron Dynamics in Coupled Quantum Wells	151
M. V. Batistuta, M. F. Stella, H. Biagi, and J. C. da Costa	
Simulation of Basic Circuits for Implementing a Single-Electron Stochastic Associative Memory	157
H. C. Carmo, J. G. Guimaraes, L. M. Nobrega, and J. C. da Costa	
Study of Carbon Nanotubes Growth by Atmospheric Pressure Chemical Vapor Deposition	163
C. Verissimo, S. A. Moshkalyov, A. C. S. Ramos, J. L. Gonçalves, J. León, and J. W. Swart	
Preparation and Characterization of Silicon Nanostructures Obtained by Ion Implantation	169
S. N. M. Mestanza, G. O. Dias, J. E. C. Queiroz, I. Doi, and J. W. Swart, E. Rodriguez, A. A. R. Neves, and H. Martinho	
<b>4- OPTOELECTRONICS</b>	175
III-Nitrides by Molecular Beam Epitaxy for Longer and Shorter Wavelengths ( <i>Invited</i> )	177
W. J. Schaff, H. Lu, J. Hwang, H. Wu, X. Chen, and L. F. Eastman	
InGaAlAs Multi-Quantum-Well Electro-Absorption Modulators for 10Gb/s Uncooled Operation in the C-Band	183
N. C. Frateschi, J. Zhang, W. J. Choi, H. Gebretsadik, R. Jambunathan, and A. E. Bond.	
Improved Performance of Amplitude Modulator Structures Containing a nipi Delta Doping Superlattice	189
C. V.-B. Tribuzy, M. C. L. Areiza, S. M. Landi, M. Borgstrom, M. P. Pires, and P. L. Souza	

Radiation-Tolerant CMOS APS V. C. Silva, L. T. Dornelles, P. P. Canazio, F. V. dos Santos, A. Mesquita, and M. V. da Silva	195
High Sensitivity Obtained by Three-Color Detector APS-CMOS Using Antireflective Coating S. N. M. Mestanza, C. Biasotto, A. C. Costa, G. O. Dias, I. Doi, J. A. Diniz, and J. W. Swart	201
Birefringence Characterization of TiO <sub>2</sub> Thin Films Deposited by DC Sputtering Over Tilted Substrates H. P. de Araújo, S. G. dos Santos Filho, and M. A. Valle	207
<b>5- PACKAGING AND RELIABILITY</b>	<b>213</b>
Test Chip for Qualification of Packaging Assemblies J.-Y. Delétage, H. Frémont, O. Puig, C. Pellet, P. Fouillat, and Y. Danto	215
Silicon Micro-Channel Cooling Device C. C. S. Nicole, E. H. E. C. Eummelen, R. H. W. Pijnenburg, R. Dekker, and C. Lasance	221
Evaluation of SRAMs Reliability for Space Electronics Using Ultra Short Laser Pulses F. Darracq, H. Lapuyade, P. Fouillat, V. Pouget, D. Lewis, and Y. Danto	227
Analysis of Measurement Systems and DOE for Reflow Soldering Process in SMT A. C. Bueno, M. P. Shiki, V. R. de Lima, L. G. L. Brandão, and M. M. Oka	233
<b>6- NOVEL MATERIALS AND DEVICES</b>	<b>239</b>
Wafer Bonding: a Flexible Way to Manufacture SOI Materials for High Performance Applications ( <i>Invited</i> ) S. Bengtsson, P. Amirfeiz, and M. Johansson	241
Silicon Oxynitride Gate-Dielectric Made by ECR Plasma Oxynitridation G. A. Manera, J. A. Diniz, S. A. Moshkalyov, G. S. Lujan, I. Doi, and J. W. Swart	253
Formation and Stability of Ni(Pt)Si/Poly-Si Layered Structure R. E. Santos, I. Doi, R. C. Teixeira, J. A. Diniz, J. W. Swart, and S. G. dos Santos	259

Growth and Morphology of Electroless Cobalt Thin Films Deposited onto Paladium Pre-Activated Silicon Surfaces A. I. Hashimoto, G. Gozzi, and S. G. dos Santos Filho	265
Characterization of Thin MOS Gate Oxides Grown in Pyrogenic Environment W. A. Nogueira, and S. G. dos Santos Filho	271
Analysis of Electrospinning of Nanofibers as a Function of Polyacrylonitrile (PAN) Concentration R. D. Martinez, A. N. R. da Silva, R. Furlan, I. Ramos, and J. J. Santiago-Avilés	277
Formation of 3c-SiC Films on Silicon by Thermal Annealing Process A. R. Oliveira, and M. N. P. Carreño	283
Properties of Amorphous SiC Thin Film Grown by RF Magnetron Sputtering S. M. Rajab, I. C. Oliveira, M. Massi, and H. S. Maciel	289
Electrical Characteristics of PECVD Silicon Oxide Deposited with Low TEOS Content at Low Temperatures O. F. Rocha, C. E. Viana, L. C. D. Gonçalves, and N. I. Morimoto	295
Self-Assembled Polystyrene Micro-Spheres Applied for Photonic Crystal and Template Fabrication D. S. Raimundo, F. J. R. Fernandez, and W. J. Salcedo	301
Characteristics of Polycrystalline Si <sub>1-x</sub> Ge <sub>x</sub> Alloy Deposited in a Vertical LPCVD System R. C. Teixeira, I. Doi, J. A. Diniz, J. W. Swart, M. B. P. Zakia, and S. G. dos Santos Filho	307
Electrochemical Synthesis and Structural Analysis of BaTiO <sub>3</sub> Thin Films S. Y. Nagazawa, and R. C. Ibrahim	313
Dielectric and Ferroelectric Properties of PZT and PT Thin Films for SAW Sensors Applications S. T. Shibatta-Kagesawa, E. B. Araújo, and N. Oki	319
Production, Sintering, Characterization of Ba <sub>2</sub> MgWO <sub>6</sub> Ceramics for Ceramic Components for Planar RTD Applications C. M. Lapa, I. B. Vasconcelos, E. J. P. Santos, and Y. P. Yadava	325
Electrical Characterization of Thin Gate Oxynitride Obtained by N <sup>+</sup> Implantation into Polysilicon/ Thermal Oxide/ Silicon Structure L. Z. Toquetti, S. G. dos Santos Filho, J. A. Diniz, and J. W. Swart	331

<b>7- PROCESS TECHNOLOGY</b>	<b>337</b>
The Influence of Additives on Electrical Characteristics of DLC Films Deposited by Reactive Sputtering R. D. Mansano, A. P. Mousinho, L. S. Zambom, M. S. de Medeiros, P. Verdonck, M. Guerino, and M. Massi	339
Reactive Ion Etching of SiGe Using Halogen-Based Plasmas C. Reyes-Betanzo, and S. A. Moshkalyov	345
The Influence of the AC Component of the Plasma Potential on the Measurements of the Ion Flux L. Swart, and P. Verdonck	351
Formation of Nickel Silicides onto As-Doped Silicon Using a Thin Pt/Pd Interlayer R. W. Reis, S. G. dos Santos Filho, I. Doi, and J. W. Swart	357
Selective Etching of Polycrystalline Silicon in a Hexode Type Plasma Etcher R. Vieira, V. Martarello, S. A. Moshkalyov, J. A. Diniz, and J. W. Swart	363
Control of Micron and Submicron Feature Dimensions in 2 $\mu$ m Resolution Photolithographic System for MOS and MEMS Applications N. P. Fioravante, Jr., L. T. Manera, S. A. Moshkalyov, J. A. Diniz, P. J. Tatsch, H. R. J. Grados, I. Doi, and J. W. Swart	369
Use of a Langmuir Probe for ECR Plasma Characterization A. M. Daltrini, S. A. Moshkalyov, A. C. S. Ramos, and J. W. Swart	375
Deep Dry Etching of Silicon Using Bosch Type Process V. O. Guidini, S. A. Moshkalyov, and P. J. Tatsch	381
Oxygen Plasma Etching Mechanisms of Resist P. Verdonck	387
Subject index	393
Author index	396
