

## **Table of Contents**

<b>Preface</b>	iii
<b>The Marine Environment</b>	
Corrosion Performance and Testing of Materials in Marine Environments <i>D. A. Shifler</i>	1
<b>Corrosion Characterization and Monitoring of Materials</b>	
A New Look at Graphical Representation of Impedance Data <i>M. E. Orazem, N. Pébère, and B. Tribollet</i>	13
Electrochemical Noise Analysis for the Under-Film Corrosion of Polymer-Coated Iron <i>Y. Itoi, S. Take, and M. Okuyama</i>	30
Corrosion Monitoring of Steels Based on Electrochemical Noise Impedance <i>M. Yaginuma, A. Nishikata, and T. Tsuru</i>	38
Application of AC Impedance Method to Atmospheric Corrosion Monitoring of Low alloy Steels <i>H. Katayama, M. Yamamoto, and T. Kodama</i>	46
Corrosion Monitoring in Marine Environments using Electrochemical Impedance <i>M. Itagaki, M. Endou, K. Watanabe, H. Katayama, K. Node, and H. Masuda</i>	53
Electrochemical Impedance Spectroscopy Evaluation of the Skin and Bulk Corrosion Behavior of Die Cast and Thixocast AZ91D in 5% NaCl Solution <i>S. Jin, N. Giguere, D. Dubé, R. Tremblay, and E. Ghali</i>	62
An Evaluation of Epoxy Coatings Submitted to Multiple Thermal Immersion Aging <i>M. E. Angeles-San Martín, E. García-Ochoa, and F. J. Rodríguez-Gómez</i>	74
Short Term Predictive Testing for Cut Edge Corrosion Resistance in Zinc Aluminium Alloy Galvanised Steels <i>J. Elvins, J. H. Sullivan, J. A. Spittle, and D.A. Worsley</i>	84
<b>Atmospheric Corrosion of Carbon Steel and Other Alloys</b>	
Enhancement of Electric Conductivity of the Rust Layer on Weathering Steels by Water Adsorption <i>T. Ohtsuka, T. Komatsu, and T. Sasaki</i>	95

Atmospheric Corrosion Monitoring of Weathering Steels using AC Impedance Technique <i>A. Nishikata, T. Kojima, and T. Tsuru</i>	102
KFM Observation of Atmospheric Corrosion on Low Alloy Steels Near the Seashore Environment <i>H. Masuda and H. Katayama</i>	111
The Effect of Water Film Thickness on the Atmospheric Corrosion Behavior of Carbon Steel <i>T. Shinohara, Y. Hosoya, W. Oshikawa, and S. Motoda</i>	121
Corrosion Protection Mechanism of the Advanced Weathering Steel (Fe-3.0Ni-0.40Cu, Mass %) in a Coastal Area <i>M. Kimura, H. Kihira, M. Nomura, and Y. Kitajima</i>	133
Corrosion Behavior of Stainless Steels in Neutral and Acidified Sodium Chloride Solutions by Electrochemical Impedance Spectroscopy <i>L. M. Calle, M. R. Kolody, and R. D. Vinje</i>	143
Initial Stage of Pitting Corrosion of SUS 304 Under Thin Electrolyte Layers Containing Chloride Ions <i>Y. Tsutsumi, A. Nishikata, and T. Tsuru</i>	155
Atmospheric Corrosion of Zinc and Zinc Alloys Using In-Situ Raman Spectroscopy <i>M. Ueda, M. Matsuda, and T. Ohtsuka</i>	166
<b>Corrosion and Environmental Cracking of Aluminum Alloys</b>	
Effect of Cu Content on Corrosion Behavior and Chromate Conversion Coating Protection of 7xxx Series Al Alloys <i>Q. Meng</i>	173
Exploring the Relationship of Morphology and Structure to Pit Initiation in Cl-Implanted Al Thin Films <i>N. Missert, R. G. Copeland, C. M. Johnson, P. G. Kotula, D. Ellswick, and J. J. Hren</i>	187
The Effect of Implanted Cl on the Pitting Behavior of Aluminum Thin Films <i>L. M. Serna, C. M. Johnson, F. D. Wall, and J. C. Barbour</i>	194
Experimental and Computational Evaluation of the Corrosion of ALCLAD AA2024-T3 Exposed at a Seacoast Environment <i>F. Cui, F. J. Presuel-Moreno, and R. G. Kelly</i>	201
Analysis of Local Changes in pH During Dissolution of Aluminum Alloy 2024-T3 in Aqueous NaCl <i>R. G. Copeland, N. Misser, and K. Barrett</i>	216

Imaging and Characterization of Multiple Stress Corrosion Cracks in AA2024-T3  
by X-ray Radiography 223  
*X. Liu, G. S. Frankel, B. Zoofan, and S. I. Rokhlin*

Sensitization and Environmental Cracking of 5xxx Aluminum Marine Sheet and  
Plate Alloys 232  
*F. S. Bovard*

Assessment of Corrosion Behavior and Stress Corrosion Cracking Susceptibility of  
Nanocrystalline Bulk Al-Mg Based Alloys in Chloride Containing Solutions 244  
*E. Sikora, B. A. Shaw, and M. Sharma-Judd*

Microelectrochemical Investigation of the Deformed Surface Layer on Wrought  
Aluminum Alloy 256  
*P. Premendra, F. D. Tichelaar, L. Philippe, H. Terryn, H. de Wit,  
and L. Katgerman*

Electrochemical Noise Study on the Galvanic Corrosion of Anodized Aluminum in  
Chloride Environments 265  
*S. Masatoshi, S. Ukiya, and T. Hideaki*

### **Corrosion Prediction**

Prediction and Measurement of Pitting Damage Function for AISI 403 Blade Alloy 273  
*Y. Zhang, D. Macdonald, M. Urquidi-Macdonald, G. Engelhardt, and B.  
Dooley*

### **Corrosion, Passivation, and Inhibition Processes of Iron- and Nickel-base Alloys**

Effect of Nitrate on the Repassivation Potential of Alloy 22 in Chloride Containing  
Environments 285  
*G. O. Ilevbare, K. J. King, S. R. Gordon, H. A. Elayat, G. E. Gdowski, and  
T. S. E. Summers*

A Study of the Galvanic Corrosion Behavior of Inconel 718 after Electron Beam  
Welding (EBW) 299  
*C. A. Huang, T. H. Wang, W. C. Han, and C. H. Lee*

Metallurgical and Morphological Considerations for Seawater Crevice Corrosion of  
Alloy 625 311  
*F. J. Martin, P. M. Natishan, K. P. Cooper, H. N. Jones, and K. E. Lucas*

The Mechanism of Chloride-Induced Filiform Corrosion on Iron Investigated by  
Time-Lapse Photomicrography 321  
*T. Watson, N. McMurray, G. Williams, and A. Coleman*

Temperature and Polarization Effects on Seawater Ennoblement of Alloy 59 328  
*F. J. Martin, C. Yentsch, D. Phinney, P. M. Natishan, and W. O'Grady*

Chlorinated Cold Water Treatment of Alloys for Long-Term Corrosion Protection 338  
*P. M. Natishan, F. J. Martin, and W. O'Grady*

### **Corrosion and Protection of Copper-Containing Alloys**

Corrosion of Potential Heat-Exchange Materials in Singapore Seawater 345  
*D. Blackwood, O. Liu, K. Fujita, and K. Oonishi*

Factors Affecting the Functionality of Bilayered Photoanodes for Cathodic Protection of Copper 355  
*R. Subasri, T. Shinohara, and K. Mori*

Acid Dew Corrosion Behavior of Copper and Antimony Bearing Low Alloy Steel 364  
*A. Usami*

### **Coatings and Pretreatments**

Corrosion Inhibiting and Sensing Ion Exchange Pigments For Organic Coatings 376  
*R. Buchheit, S. Chrisanti, and S. Mahajanam*

Novel Surface Treatment Processes to Protect Metal Substrates 386  
*S. P. Kumaraguru and B. Popov*

Development of Non-Toxic Polymer Coatings with Improved Biofoul Release Properties 396  
*F. Mansfeld, E. Kus, M. A. Grunlan, and W. P. Weber*

Inhibition of Corrosion-Driven Coating Delamination on Zinc by Polyaniline Emeraldine Salts 410  
*M. J. Loveridge, H. N. McMurray, and G. Williams*

Characterization of Wicking and Wetting Ability of Corrosion Prevention Compounds 421  
*F. Gui and R. G. Kelly*

Corrosion and Hydrogen Embrittlement Properties of Zn-Ni-X (X=Cd, P) Alloys 432  
*S. P. Kumaraguru, P. Ganesan, and B. N. Popov*

### **Corrosion of Advanced Materials in Chloride-Containing Environments**

Corrosion Behavior of Titanium Grade 7 in Fluoride-Containing NaCl Brines 443  
*T. Lain, M. T. Whalen, and L. Wong*

Improvement of Pitting Corrosion of Ti Plasma-Sprayed NiTi Shape Memory Alloy by Sealing Treatment <i>M. Okuyama, S. Take, and Y. Itoi</i>	454
Corrosion Properties of MoSi <sub>2</sub> + Si <sub>3</sub> N <sub>4</sub> Nanocomposites in Acidic and Basic Aqueous Environments <i>R. Mohan, C. Suryanarayana, T. Du, and V. Desai</i>	461
Carbon Steel Corrosion Kinetics in sodium Chloride Dynamic Solutions for Application to Galvanochemical Processes <i>A. Pikelny and O. Piklenaya</i>	473
Localized Corrosion Currents and pH Profile over B <sub>4</sub> C, SiC, and Al <sub>2</sub> O <sub>3</sub> Reinforced 6092 Aluminum Composites in Artificial Seawater <i>H. Ding and L. H. Hihara</i>	484
Influence of Corrosion Environment on SCC Behavior of SUS 304 In H <sub>2</sub> SO <sub>4</sub> – NaCl Aqueous Solutions <i>S. Sunada, A. Motozawa, and K. Majima</i>	496
Influence of Stress-Induced Martensite on SCC Behavior of SUS 304 In H <sub>2</sub> SO <sub>4</sub> – NaCl Aqueous Solutions <i>S. Sunada, A. Motozawa, and K. Majima</i>	504
<b>Index</b>	511
