

## TABLE OF CONTENTS

<b>PREFACE</b>	iii
<b>TABLE OF CONTENTS</b>	v
<b>SECTION 1: FUNDAMENTALS AND MECHANISMS OF ELECTRODEPOSITION</b>	<b>1</b>
<b>Some Considerations Concerning the Mechanism of Charge-Transfer in Metal Deposition and Dissolution</b>	<b>3</b>
<i>E. Gileadi</i>	
<b>Superconformal Electrochemical Deposition of Gold for Interconnects in Integrated Circuits</b>	<b>13</b>
<i>Z. Hu and T. Ritzdorf</i>	
<b>Quantifying Competitive Adsorption Dynamics in Superfilling Electrolytes</b>	<b>23</b>
<i>T. P. Moffat, D. Wheeler, and D. Josell</i>	
<b>A Comparison Study of MPSA-CI-PEG and SPS-CI-PEG Additive Systems for Copper Electrodeposition</b>	<b>34</b>
<i>M. Tan and J. N. Harb</i>	
<b>Quantitative Monitoring of Copper Electroplating Additives and Their Breakdown Products</b>	<b>41</b>
<i>M.J. West, M.R. Anderson, Q. Wang, T.H. Bailey, A. Rosenfeld, Z.-W. Sun, and K.P. Ta</i>	
<b>Influence of Leveling Agents on Surface Roughness of Electrodeposited Copper Films</b>	<b>57</b>
<i>C. Witt, J. Srinivasan, and R. Carpio</i>	
<b>An In Situ Spectroelectrochemical Investigation into the Electrodeposition of Cu from Acidic Sulfate Solutions in the Presence of Poly(ethylene glycol)</b>	<b>67</b>
<i>B. Bozzini, C. Mele, L. D'Urzo, G. Giovannelli, and S. Natali</i>	
<b>Surface Roughness Evolution during the Initial Stages of Electroplating for Copper Interconnect Metallization</b>	<b>82</b>
<i>E. Webb, C. Gack, and J. Reid</i>	
<b>Impact of Bath Composition on the Purity and Room Temperature Anneal Characteristics of Thin Copper Films</b>	<b>96</b>
<i>J. H. Sukanto and J. D. Reid</i>	
<b>Cross-Sectional Crystallographic Analysis of Copper Electrodeposits for ULSI Metallization by EBSD</b>	<b>108</b>
<i>H.-J. Lee, K.H. Oh, and D.N. Lee</i>	
<b>Analysis of the Bottom-up Fill during Copper Metallization of Semiconductor Interconnects</b>	<b>117</b>
<i>R. Akolkar and U. Landau</i>	

<b>A Case Study in Predictive Three-Dimensional Topography Simulation Based on a Level-Set Algorithm</b>	132
<i>C. Heitzinger, A. Sheikholeslami, J. Fugger, O. Häberlen, M. Leicht, and S. Selberherr</i>	
<b>SECTION 2: ELECTROPLATING TOOLS AND PATTERN EFFECTS</b>	143
<b>Advances in Multilevel Interconnect Technology</b>	145
<i>C. E. Uzoh, T. Wang, H. Talieh, and B. M. Basol</i>	
<b>Study on the Mechanism of Electrochemical Mechanical Deposition of Copper Layers</b>	155
<i>B. M. Basol, C. E. Uzoh, and T. Wang</i>	
<b>Field Effect in “Overplating” Above Damascene Trench Clusters</b>	165
<i>J. O. Dukovic and C. Yu</i>	
<b>Leveling of Electroplated Cu in Damascene Applications</b>	184
<i>J. Reid, E. Webb, J. Sukamto, Y. Takada, and T. Archer</i>	
<b>Uniform Copper Electroplating on Resistive Substrates</b>	193
<i>R. Fang, K. Namiki, P.M. Vereecken, K.T.Kwietniak, B.C. Baker, K. Ide, H. Suzuki, H. Kanda, K. Mishima, K. Musaka, and H. Deligianni</i>	
<b>Unsteady Numerical Simulation of the Mass Transfer within a Reciprocating Paddle Electroplating Cell</b>	205
<i>G. J. Wilson and P.R.. McHugh</i>	
<b>Diffusion Boundary Layer Studies in an Industrial Wafer Plating Cell</b>	224
<i>B. Wu, Z. Liu, A. Keigler, and J. Harrell</i>	
<b>An Investigation of the Effects of Wafer Curvature Changes During Copper Damascene Processing</b>	235
<i>R.A. Carpio, S.-T.L. Dorris, J. Woodring, D. M.Owen and D. Abisia</i>	
<b>SECTION 3: DEPOSITION OF AND ON BARRIERS</b>	249
<b>Formation of Diffusion Barrier Layer on Low-k Material Using Wet Fabrication Process</b>	251
<i>M. Yoshino, T. Yokoshima, T. Osaka, A. Hashimoto, Y. Hagiwara, and I. Sato</i>	
<b>Copper Electrodeposition onto Titanium and Other Substrates: Effect of Bath Composition</b>	264
<i>M. Zheng, M. Willey, H. Song, and A.C. West</i>	
<b>SECTION 4: CLEANING PROCESSES</b>	273
<b>Fluorocarbon Post-Plasma Etch Residue Cleaning With Naphthalenide Radical Anions</b>	275
<i>C. L.Timmons and D. H. Hess</i>	

<b>Etch Rates and Etch Selectivities of p<sup>++</sup> Doped Si, Undoped Si and Dielectric Films in KOH-Ethylene Glycol-Water Solutions</b>	283
<i>J.S. Starzynski</i>	
<b>SECTION 5: PLANARIZATION</b>	295
<b>Copper Electropolishing and Its Application to ULSI Copper Planarization</b>	297
<i>B. Du and I. I. Suni</i>	
<b>A Comparative Study of Slurry Flow and Transport in CMP Polishing Pads of Three Groove Arrays</b>	308
<i>G. P. Muldowney and D. P. Tselepidakis</i>	
<b>Slurry Backmixing Effects in CMP Rotary and Belt Polishers</b>	318
<i>G. P. Muldowney</i>	
<b>Selection of an Oxidant for Copper CMP</b>	327
<i>M. Anik</i>	
<b>SECTION 6: MEMS AND MAGNETIC MATERIALS</b>	339
<b>MEMS Fabrication for Wireless Communications Using Copper Interconnect Technology</b>	341
<i>H. Deligianni, J.M. Cotte, C.V. Jahnes, P. Buchwalter, N. Hoivik, M. Krishnan, J. Tornello, J.H. Magerlein, and D.E. Seeger</i>	
<b>Magnetically Bistable Actuators for Micro-RF Switch</b>	353
<i>G.D. Gray, and P.A. Kohl</i>	
<b>Electrochemically Formed Biaxial Stress Gradients for Improved Electrostatic Actuation</b>	376
<i>G.D. Gray, M.J. Morgan, and P.A. Kohl</i>	
<b>PVD Silver as a Material of Choice for Microwave Passives in Silicon Technology</b>	393
<i>V. V. Levenets, R. E. Amaya, N. G. Tarr, and T. J. Smy</i>	
<b>Large Volume, High Performance Electroplated Co-Pt(P) Micromagnets for MEMS Applications</b>	404
<i>I. Zana, D. P. Arnold, and M.O. Allen</i>	
<b>Two-Dimensional Computational Model for Electrochemical Micromachining with Ultrashort Voltages Pulses</b>	412
<i>J. A. Kenney and G. S. Hwang</i>	
<b>Comparison of FECO Films Plated from an Ammonium-Containing Sulfate Bath and from a SBA-Containing Sulfate Bath</b>	420
<i>I. Shao, L.T. Romankiw, E.I. Cooper, C. Bonhote, J. Lam, and H. Xu</i>	
<b>Aging of Ni Sulfamate Electrolytes during the Electrodeposition of MEMS Structures</b>	432
<i>J. J. Kelly, S. H. Goods, and A. A. Talin</i>	
<b>Fabrication of Hard Magnetic Micro-arrays by Electroless Codeposition for MEMS Actuators</b>	448
<i>S. Guan and B. J. Nelson</i>	

<b>CoNi/Cu Multilayers by Electrochemical Deposition</b>	457
<i>J. Zhang, M. Moldovan, D. P. Young, and E. J. Podlaha</i>	
<b>Immersion Plating of Bismuth on Tin-Based Alloys to Stabilize Lead-Free Solders</b>	467
<i>E. I. Cooper, C. C. Goldsmith, C. Mojica, S. J. Kilpatrick, and R. J. Alley</i>	
<b>AUTHOR INDEX</b>	475
<b>SUBJECT INDEX</b>	477
