

TABLE OF CONTENTS

Preface	iii
<i>Electrode Surface Studies and Monolayers</i>	
Ru-Modified Pt(100) Surfaces: Effect of Annealing on the Adsorption of CO as Monitored by Infrared Reflection Absorption Spectroscopy (IRAS) in Ultrahigh Vacuum <i>Nelson C. Yee, Gary S. Chottiner, and Daniel S. Scherson</i>	1
In-Situ EC-AFM Observation on Au(100) Electrode in Room Temperature Ionic Liquid (EMImBF ₄) <i>Nobumitsu Hirai, Kimihiko Kubo, Toshihiro Tanaka, and Shigeta Hara</i>	7
Step Decoration at Au Single Crystal Electrodes - Impact on Adsorption and Catalysis <i>Fernando Hernandez, Jean Sanabria-Chinchilla, Manuel P. Soriaga, and Helmut Baltruschat</i>	15
Nickel Underpotential Deposition on Well Defined Platinum (110) Surface <i>Marian Chatenet, René Faure, and Yvonne Soldo-Olivier</i>	25
2D Phase Transition of Viologens on HOPG Electrode Surface <i>Takamasa Sagara, Takuro Tada, Yuka Fujihara, and Kosuke Miuchi</i>	33
Demonstration of an In-Situ Electrochemical RBS System to Study Electrode-Electrolyte Interfaces <i>Adrian Hightower, Bruce Koel, and Thomas Felter</i>	46
Surface-Enhanced Raman Spectroscopy of Gold in Thiosulfate Solutions <i>Kym Watling, Ronald Woods, Gregory A. Hope, and Matthew I. Jeffrey</i>	55
In Situ Scanning Tunneling Microscopy of Au(111) in Acidic Potassium Cyanide – Adsorption of Cyanide and Dissolution of Gold <i>Chia-Haw Shue, Shueh-Lin Yau, and Kingo Itaya</i>	67
Magnetic Field Effects during Electrochemical Processes at Micro Structures <i>Andreas Bund and Holger H. Kühnlein</i>	75
Adsorption of Cations on Polarized Activated Carbons <i>Mark M. Goldin, Denis N. Namyckin, and Alexander G. Volkov</i>	84
<i>Thin Films on Electrode Surfaces</i>	
Electrochemical Redox Processes of Poly(aniline boronic acid) V ₂ O ₅ Composite <i>Eiichi Shoji and Masahiro Kusakabe</i>	97
Spectroelectrochemical Investigation of Chalcopyrite Oxidation <i>Gretel K. Parker, Ronald Woods, and Gregory A. Hope</i>	104
Interfacial Electron-Transfer and Ligand-Dissociation Characteristics of Layer-by-Layer Nanoarchitectures Constructed from Ruthenium Cluster Molecules <i>Takayuki Michi, Masaaki Abe, Shen Ye, Masatoshi Osawa, Toshihiro Kondo, Kohei Uosaki, and Yoichi Sasaki</i>	116

An Investigation into Formation Processes of Chemically Deposited Copper Sulfide Thin Films <i>Carolyn G. Munce, Stephen A. Holt, Gretel K. Parker, and Gregory A. Hope</i>	132
Conductive Diamond as an Advanced Electrocatalyst Support Material <i>Jason A. Bennett, Jian Wang, Yoshiyuki Show, and Greg M. Swain</i>	144
Glucose Detection at Sol-Derived Nanoparticulate Ir Oxide Films <i>E. M. Abu Irhayem, A. S. Jhas, and V. I. Birss</i>	152
Electrocatalytic Network Film of Polyaniline Linked Phosphomolybdate Covered Platinum Nanoparticles <i>Pawal J. Kulesza, Katarzyna Karnicka, Malgorzata Chojak, Krysztof Miecznikowski, Magdalena Skunik, Beata Baranowska, Aneta Kolary, and Lidia Adameczyk</i>	165
<i>Electrode Processes and Electrocatalysis</i>	
Model Systems for the study of Electrocatalysis at the Nanoparticle-Electrolyte-Gas Reactant Three-Phase Interface <i>Matthias Loster, Andreas Friedrich, and Daniel A. Scherson</i>	175
Magnetically Modified Carbon Paste Electrodes: Method for Construction and Demonstration of Increased Electrochemical Flux over Unmodified Carbon Paste Electrodes <i>Drew C. Dunwoody, Angela K. H. Wolf, Wayne L. Gullett, and Johna Leddy</i>	181
Electropolymerization of Aniline from Ionic Liquids <i>Amir Saheb, Mira Josowicz, Jiri Janata, and Benjamin R. Mattes</i>	192
Analysis of Electro-Kinetics of Ammonia Oxidation in Alkaline Media <i>Gerardine G. Botte</i>	203
Qualitative and Quantitative Information on the Role of Anions in Mechanisms for the Electrochemical Oxidation of Oxygenated Organics <i>Mark Schell and B. E. Kumara Swamy</i>	214
Surface Properties and Oxygen Reduction Reaction on Pt and Pt - Bimetallic Surfaces <i>V. Stamenković, K. J. J. Mayrhofer, B. S. Mun, M. Arenz, B. B. Blizanac, P. N. Ross, and N. Marković</i>	220
Characterization/Optimization of Oxygen Biocathodes for Membraneless Biofuel Cells <i>S. Topcagic, B. L. Treu, and S. D. Minteer</i>	230
Oxygen Reduction at the Rare-Earth Phthalocyanine-Modified Glassy Carbon Electrode in Aqueous Media <i>Toshihiro Ikai, Tatsuya Yonekura, Takeo Ohsaka, and Fusao Kitamura</i>	243
Reaction Intermediate of Hydrogen Evolution Reaction Studied by Surface-Enhanced Infrared Absorption Spectroscopy <i>Keiji Kunimatsu, Takahiro Senzaki, Minoru Tsushima, and Masatoshi Osawa</i>	249
<i>Electrode Processes - Applications</i>	
Some Observations Describing the Electrochemical Surface Annealing of Austenitic Stainless Steel <i>G. T. Burstein, K. Sasaki, C. McAleese, and I. M. Hutchings</i>	255

Methanol Oxidation as Anode Reaction in Zinc Electrowinning <i>M. Wesselmark, C. Lagergren, and G. Lindbergh</i>	264
The Anode Process in Cobalt Electrowinning <i>Torjus Åkre, Geir Martin Haarberg, Sarbjyot Haarberg, Jomar Thonstad, and Ole Morten Dotterud</i>	276
Barium Metaplumbate (BaPbO ₃) Electrodes for Ferroelectric Thin Films <i>Stacey W. Boland and Sossina M. Haile</i>	288
pH-Dependent Binding Interaction Between Thiol Monolayers Having Terminal Amino Group and Indigo Ion <i>Takahiro Yamaguchi, Teruhisa Komura, Kohshin Takahashi, and Yuta Endo</i>	294
The Electrolytic Decomposition Mechanism of Ammonia to Nitrogen at an Iridium Oxide Anode <i>Kwang-Wook Kim, Young-Jun Kim, In-Tae Kim, Geun-Il Park, and Eil-Hee Lee</i>	303
Author Index	312
