Preface	iii
SESSION I: SOI Physics and Simulations	
Advanced SOI MOSFETs: structures and device physics O. Faynot, A. Vandooren, R. Ritzenthaler, T. Poiroux, J. Lolivier, C. Jahan, S. Barraud, T. Ernst, F. Andrieu, M. Casse, B. Giffard, and S. Deleonibus	<i>Invited</i> 1
Nanoscale SOI MOSFETs: In search for the best geometry J. Li, T. J. Walls, and K. K. Likharev	<i>Invited</i> 11
Subthreshold quantum-mechanical effects in undoped double-gate MOSFETs V. P. Trivedi and J. G. Fossum	21
Calibration of numerical simulation tools for fine geometry SOI CMOS R. Long, R. Duane, A. Mathewson, B. O' Neill	27
Monte Carlo simulation of silicon-based velocity modulation transistors C. Sampedro, F. Gámiz, A. Godoy, M. Prunnila, and J. Ahopelto	33
Influence of confined acoustic phonons on the electron mobility in ultrathin silicon-on-insulator layers F. Gámiz, P. Cartujo-Cassinello, J. B. Roldán, C. Sampedro, and A. Godoy	39
Evaluation of ultra-thin double gate MOSFETs for the 45 nm technology node N. Barin, C. Fiegna, D. Esseni, E. Sangiorgi	45
Meta-stable dip (MSD) effect in fully-depleted SOI CMOSFETs M. Bawedin, J. G. Yun, S. Cristoloveanu, H. D. Lee, C. Raynaud, and D. Flandre	51

SESSION II: Technology, Circuits, and Radiation Hardness

High performance SOI technology for sub-45nm gate length CMOS manufacturing	<i>Invited</i>	57
M. Horstmann, D. Greenlaw, P. Huebler, R. Stephan, Th. Feudel, A. Wei, K. Frohberg, J. Hoentschel, P. Javorka, G. Burbach, C. Schwan, C. Peters, M. Lenski, P. Press, Th. Kammler, H. Bierstedt, R. Otterbach, A. Neu, K. Wiczorek, M. Schaller, H. Salz, J. Hohage, H. Ruelke, J. Klais, G. Grasshoff, E. Ehrichs, S. Goad, M. Raab, and N. Kepler		
Implementation of high performance operational transconductance amplifiers using graded-channel SOI NMOSFETs		69
S. P. Gimenez, M. A. Pavanello, J. A. Martino, and D. Flandre		
A novel sub-50 nm DG-SOI self-restoring ratioed domino logic		75
D. P. Ioannou, D. K. Kontos, and D. E. Ioannou		
SOI image sensor optimized pinned photodiode on handle wafer		81
Y. S. Cho, S. I. Kwon, K. Y. Park, K. Sawada, M. Ishida, and S. Y. Choi		
Recent radiation issues in silicon-on-insulator devices		87
M. L. Alles, D. R. Ball, R. D. Schrimpf, D. M. Fleetwood, R. A. Reed, and B. Jun		
Total-dose radiation hardness of the SOI 4-gate transistor (G⁴-FET)		99
K. Akarvardar, S. Cristoloveanu, R. D. Schrimpf, B. Dufrene, P. Gentil, B. J. Blalock, and M. M. Mojarradi		
Estimating proton induced SEU cross section of SOI CMOS SRAMS		107
S. T. Liu, H. Liu, D. K. Nelson, M. Flanery, and H. L. Hughes		
High-temperature behavior of fully-depleted SOI MOSFETs in case of charge instability of buried oxide		113
A. N. Nazarov, Y. Houk, Ya. N. Vovk, V. S. Lysenko, and D. Flandre		

SESSION III

The temperature mobility degradation influence on the ZTC of PD and FD SOI MOSFETs	119
L. M. Camillo, J. A. Martino, E. Simoen, and C. Claeys	
Low temperature and channel engineering influence on harmonic distortion of SOI NMOSEFTs for analog applications	125
M. A. Pavanello, A. Cerdeira, M. A. Alemán, J. A. Martino, L. Vancaillie, and D. Flandre	
Process-induced distortion of silicon-on-insulator wafers	131
P. E. Riley, T. Manchester, B.-Y. Ang, and J. Thomas	
Modification of Si/SiO₂ interface in SOI structures by hydrogen implantation: radiation tolerance	137
I. V. Antonova	
High mobility poly-silicon characterization using a modified single cut PCT structure	143
R. Sanders, T. Keyser, and J. Yue	
SIMS measurements of metal contamination in SOI	149
M. Hong Yang, A. Wang, M. Neuburger, and R. S. Hockett	

SESSION IV: Ion-Induced Splitting of Semiconductors

Isotope effects in low-energy ion-induced splitting	<i>Invited</i>	155
B. Terreault, M. Chicoine, N. Desrosiers, A. Giguère, G. Hobler, O. Moutanabbir, G. G. Ross, F. Schiettekatte, P. J. Simpson, and T. Zahel		
Determining the mechanisms of fracture in Group-IV materials	<i>Invited</i>	167
K. K. Bourdelle		
Atomistic simulation of the isotope effect on defect formation in H/D-implanted Si		179
T. Zahel, G. Otto, and G. Hobler		
On the mechanism of the Smart Cut™ layer transfer in relaxed SiGe		185
P. Nguyen, C. Aulnette, E. Guiot, N. Daval, K. K. Bourdelle, I. Cayrefourcq, C. Deguet, S. Sartori, A. Tauzin, C. Lagahe-Blanchard, and A. Soubie		

SESSION V: Materials, Photonics, and Electrical Properties

Mobility enhancement through substrate engineering I. Cayrefourcq, M. Kennard, F. Metral, C. Mazuré, A. Thean, M. Sadaka, T. White, and B.Y. Nguyen	<i>Invited</i>	191
Silicon-on-Insulator (SOI) as a photonics platform D.-X. Xu, A. Delage, P. Cheben, B. Lamontagne, S. Janz, and W. N. Ye	<i>Invited</i>	207
Ring resonator with sharp U-turns using an SOI-based photonic crystal waveguide Y. Iida, Y. Omura, F. Urakawa, and Y. Ogawa		219
Germanium hut nanostressors on free-standing ultrathin SOI M. Roberts, D. Tinberg, P. Evans, M. Lagally, C.-H. Lee, A. Lal, Y. Xiao, B. Lai, and Z. Cai		225
ALD alumina films as buried dielectric layers for SOI structures C. de Beaumont, H. Moriceau, O. Rayssac, N. Bresson, S. Cristoloveanu, A. M. Charvet		231
New SOI devices transferred onto fused silica by direct wafer bonding C. Lagache-Blanchard, B. Aspar, P. Paillet, V. Ferlet-Cavrois, N. Fel, C. Pavageau, J. du Port de Poncharra, and H. Moriceau		237
Formation of single-crystal silicon layers on insulator islands using selective epitaxial growth and laser crystallization H. S. Cho, W. Xianyu, X. Zhang, H. Yin, D. Y. Kim, K. Bae Park, J. Yeon Kwon, and T. Noguchi		243
Impact of the Schottky contacts on characterization of ultra-thin SOI pseudo-MOS transistors S. Sato, K. Komiya, N. Bresson, Y. Omura, and S. Cristoloveanu		249
Charge accumulation in oxides of SOI wafers fabricated by hydrogen slicing O. V. Naumova, A. A. Frantuzov, D. V. Nikolaev, and V. P. Popov		255

SESSION VI: Technology and Electrical Properties

Demonstration and device design consideration of V_{th}-controllable independent double-gate MOSFET (4-Terminal XMOS) M. Masahara, Y.-X. Liu, K. Sakamoto, K. Endo, T. Matsukawa K. Ishii, T. Sekigawa, H. Koike, and E. Suzuki	<i>Invited</i>	261
---	----------------	-----

Multiple independent gate field effect transistors – device, process, applications	<i>Invited</i>	273
L. Mathew, M. Sadd, A. Thean, T. Stephens, R. Mora, M. Zavala, B. Y. Nguyen, R. Rai, S. Backer, R. Shimer, W. Zang, M. M. Chowdhry, and J. G. Fossum		
Corner and coupling effects in multiple-gate FETs		283
R. Ritzenthaler, O. Faynot, C. Jahan, and S. Cristoloveanu		
Analysis of deep submicrometer bulk and fully depleted SOI NMOSFET analog operation at cryogenic temperatures		289
M. A. Pavanello, J. A. Martino, E. Simoen, and C. Claeys		
Effects of etching processes on the properties of pseudo-MOSFETs for the UTSOI characterization		295
Y.-H. Bae, K.-W. Kwon, J.-H. Lee, J.-H. Lee, H.-J. Woo, and S. Cristoloveanu		
Mercury Pseudo-MOSFET (HgFET) drain current dependence on surface treatment		301
J. Y. Choi and D. K. Schroder		
Short-channel, narrow channel, and ultra-thin oxide effects in advanced SOI MOSFETs		309
S. Zaouia, S. Goktepe, A. H. Perera, and S. Cristoloveanu		
Adaptation of Ψ-MOSFET techniques for ultra thin SOI		317
N. Bresson, F. Allibert, and S. Cristoloveanu		
Electrical characteristics of SOI-like structures formed in nitrogen or oxygen implanted silicon treated under high pressure		325
I. V. Antonova, A. Misiuk, and C. A. Londos		
SESSION VII: Technology and Characterization		
Is SOI CMOS a promising technology for SOCs in high frequency range?	<i>Invited</i>	331
C. Raynaud, F. Giancesello, C. Tinella, P. Flatresse, R. Gwoziecki, P. Touret, G. Avenier, S. Haendler, O. Gonnard, G. Gouget, G. Labourey, J. Pretet, M. Marin, R. Di Frenza, D. Axelrad, P. Delatte, G. Provins, J. Roux, E. Balossier, J. C. Vildeuil, S. Boret, B. Van Haaren, P. Chevalier, L. Boissonnet, T. Schwartzmann, A. Chantre, D. Gloria, E. De Foucauld, P. Scheer, C. Pavageau, and G. Dambrine		

Characterization of ultra thin SOI and SSOI substrates: defect and strain analysis	<i>Invited</i>	345
S. W. Bedell, H. Hovel, A. Domenicucci, K. Fogel, A. Reznicek, and D. K. Sadana		
UV scanning enabling advanced SOI defectivity monitoring		357
C. Maleville, C. Moulin, D. Delprat, W. McMillan, J. Payne, K. Birdwell, and R. Moirin		
SIMS measurements of dopants in SOI wafers		363
S. P. Smith, S. Wang, I. Abdelrehim, and R. S. Hockett		
Evaluation of commercial SGOI and SSOI wafers and comparison with epitaxially grown strained-Si by means of laser confocal inspection system		371
A. Ogura and O. Okabayashi		
Optical Characterization of Implanted Thin SOI Films		377
L. Clavelier, O. Faynot, and G. Barna		
Investigation of second-harmonic generation for SOI wafer metrology		383
R. Pasternak, B. Jun, R. D. Schrimpf, D. M. Fleetwood, M. A. Alles, R. P. Dolan, R. W. Standley, and N. H. Tolk		
SUBJECT INDEX		389
AUTHOR INDEX		393
